william H. WALKER A. V. C. pounds, and to move it to and fro upon as mooth ing him about, and administering him, at every pavement by pushing within.

avement by pushing within. [avorable opportunity, a powerful kick with a "Mr. Newport has given other instances of heavy boot in the side, he managed to hold in ect power equally remarkable. Having on uninjured until the arrival of his compan-once fastened a small kind of Carabus, an ele gantly formed ground beetle, weighing three with one well-aimed blow from a club. place of twenty-five degrees nearly eighty-five he was nearly exhausted. and twenty-five grains, exclusive of the fric. days, he had put one of his feet into a steel tion to overcome in moving its load, as though trap, and had thereby lost the entire foot to a man were to drag up a hell of similar inclina. the first joint. a wagon weighing two tons and a half, having first taken the wheels off."

According to the same excellent authority, the stag beetle-Lucgnuscerous-has been known to gnaw a hole an inch in diameter **Rown to graw a hole an inch in diameter though the side of an iron canister in which wholesale or recall by P. HORNEGOOK & CO. it was confined, and on which the marks of its it was confined, and on which the marks of its jaws was distinctly visible, as proved by Mr. Stephens, who exhibited the canister at one of the meetings of the Entomological Society.

Let us look at the powers of insects exer-

cised in the act of flying. The house flies-Musca domestica-that wheel and play beneath the ceiling for hours together, ordinarily move Spence observe, a race-noise count close of the part o a mile in a minute." Our little fly, in her swiftest flight, will go more than one third of a mile. Now compare the immense difference of the size of the two animals—ten millions of the fly would hardly counterpoise one racer—and how wonderful will the velocity of this minute creature appear! Did the fly equal the race horse in size, and retain its powers in the ratio of its magnitude, it would traverse the globe with the rapidity of lightning. Some of the flies that bount our gardens, shoot along so rapidly that the eye cannot follow them in flight.

Nor are these tiny creatures less maters of the artis of running and leaving. DeLisle the earts of running and leaving. DeLisle the carts of running and leaving the carts of the carts of running and leaving. DeLisle the carts of the carts of the carts of running and leaving. DeLisle the carts of the carts of running and leaving. DeLisle the carts of t

the arts of running and leaping. DeLisle THE GREAT REMEDY. mentions a fly so minute as almost to be invisible, which ran nearly six inches in a second, and in that space was calculated to have made FEVER AND AGUE CURE, one thousand and eighty steps! This, according to the calculation of Kirby and Spence, is

V. H. Smith & Co.'s

JEFFERSON STREET, OPPOSITE OWEN'S HOTHL, LOUISVILLE, KY. one thousand and eighty steps: This, according to the calculation of Kirby and Spence, is as if a man whose steps measured only two feet, should run at the incredible rate of twenty miles in a minute.

Every one has had occasion to observe, not always without an emotion of anger, the leaping powers of the flea—Pulix irrilans. A bound of two hundred times its own length is a common feat, as if a man should jump twelve hundred feet, or a quarter of a mile! What a pity that insects were not allowed to be competitors in the athletic games of old!

Going to Bed —Going to bed we have always considered one of the most sober, serial ways considered one of the most sober, serial contents and serial contents are always and neveron specific the few that we offer, which may be called home on the standard price of the most sober, serial ways considered one of the most sober, serial ways considered one of the most sober, serial ways considered one of the most sober, serial contents of the calculation of Kirby and Spence, is as if a man whose steps measured only two feet, should run at the incredible rate of twenty miles in a minute.
